PROJECT INTRODUCTION

The Silver Point Restaurant project is a project designed to optimize restaurant management operations. It boasts a range of features aimed at enhancing user experience and operational efficiency. The implementation of comprehensive Authorization and Authentication ensures that only authorized personnel can access specific functionalities. The system also incorporates advanced data management capabilities such as Searching, Sorting, and Filtering, enabling users to quickly locate and organize information. Pagination functionality further contributes to a seamless user interface, particularly in handling large datasets. With features like Add to Cart, Checkout, and Order Creation, the project facilitates a smooth customer journey, while supporting Multiple Payment Modes like PayPal and COD that enhances flexibility for patrons. The inclusion of complete CRUD operations, including image management, ensures a comprehensive approach to data manipulation. Moreover, Email Verification and Forget-Password functionalities enhance security and user account recovery. Altogether, the Silver Point Restaurant project offers a holistic solution for modern restaurant management, addressing key aspects of authentication, data handling, and customer interaction.

TECH-STACKS USED:

- Code Editor (IDE): Visual Studio Code
- XAMPP1: MySQL Database
- CSS Framework: Bootstrap 4.1
- UI Scaffold: Breeze UI
- JS Framework: Not Used
- Database Used: MySQL with phpMyAdmin.
- JavaScript
- PayPal API for Payment Integration

AUTHENTICATION AND AUTHORIZATION

LOGIN CREDENTIALS

As my system have multiuser Roles:

For Admin

Email: admin@admin.com

Password: [password](#)

For User

Email: sandypoudel24@gmail.com

Password: [password](#)

AUTHORIZATION

The project employs dual user authorization, distinguishing between admin and regular users. Admins access an exclusive dashboard for comprehensive system management, while regular users are directed to a user-friendly homepage. This tailored approach optimizes user experience, offering specialized features for efficient restaurant administration and customer interactions.

AUTHENTICATION

Authentication approach enhances security by restricting access to features solely to registered users, fostering a more personalized and controlled user experience within the restaurant management system

Models

The screenshot shows the Kodecs IDE interface with the title bar "component-2-sandesh123paudel". The left sidebar is the Explorer view, showing the project structure under "COMPONENT-2-SANDESH123PAUDEL". The current file is "Cart.php" located in the "app/Models" directory. The code editor displays the following PHP code:

```
<?php  
namespace App\Models;  
use Illuminate\Database\Eloquent\Factories\HasFactory;  
use Illuminate\Database\Eloquent\Model;  
  
class Cart extends Model  
{  
    use HasFactory;  
  
    protected $guarded = [];  
  
    public function products()  
    {  
        return $this->belongsTo(Product::class,'product_id','id');  
    }  
}
```

The terminal tab shows the command "INFO Caching the framework bootstrap files." and the routes command output.

Views

The screenshot shows the Kodecs IDE interface with the title bar "component-2-sandesh123paudel". The left sidebar is the Explorer view, showing the project structure under "COMPONENT-2-SANDESH123PAUDEL". The current file is "master.blade.php" located in the "resources/views/frontend" directory. The code editor displays the following Blade template code:

```
<script src="https://code.jquery.com/jquery-3.6.4.min.js"></script>  
<!-- Bootstrap JS (with Popper.js) -->  
<script src="https://stackpath.bootstrapcdn.com/bootstrap/4.5.2/js/bootstrap.min.js"></script>  
<script src="https://cdn.jsdelivr.net/npm/sweetalert2@10"></script>  
  
<body>  
    @include('frontend.header')  
  
    <div class="content">  
        @yield('content')  
    </div>  
  
    @include('frontend.footer')  
  
</body>  
</html>
```

The terminal tab shows the command "INFO Caching the framework bootstrap files." and the routes command output.

Screenshot of a Kodecs IDE showing the code editor for a Blade template file (`admin_dashboard.blade.php`). The code is a partial view for the admin dashboard, extending the `admin.layouts.app` layout. It includes sections for header, sidebar, and main content, with a specific section for orders.

```

1 @extends('admin.layouts.app')
2
3 @section('content')
4
5 <section class="content-header">
6   <div class="container-fluid">
7     <div class="row mb-2">
8       <div class="col-sm-6">
9         <h1>Silver Point Restaurant</h1>
10        </div>
11        <div class="col-sm-6">
12          <ol class="list-group list-group-bordered">
13            <li>Orders</li>
14            <li>Products</li>
15            <li>Users</li>
16            <li>Logs</li>
17          </ol>
18        </div>
19      </div>
20    </div>
21    <!-- Main content -->
22    <div class="row">
23      <div class="col-12">
24        <div class="card">
25          <div class="card-body">
26            <h3>{{ $totalOrders }}</h3>
27            <p>Total Orders</p>
28          </div>
29        </div>
30      </div>
31    </div>
32  </div>
33  <div class="row">
34    <div class="col-12">
35      <a href="{{ route('admin.orders') }}" class="small-box-footer text-dark">>More info <i class="fas fa-arrow-circle-right"></i></a>
36    </div>
37  </div>

```

The IDE interface shows tabs for `web.php`, `master.blade.php`, `admin_dashboard.blade.php`, `home.blade.php`, `DatabaseSeeder.php`, `ProductController.php`, and `MenuController.php`. The bottom status bar indicates the terminal is active in bash mode.

Controllers

Screenshot of a Kodecs IDE showing the code editor for a Laravel controller (`CategoryController.php`). The controller extends the `Controller` class and defines three methods: `category()`, `addCategory()`, and `storeCategory()`.

```

1 <?php
2
3 namespace App\Http\Controllers\Backend;
4
5 use App\Models\Category;
6 use App\Http\Controllers\Controller;
7 use Illuminate\Http\Request;
8 use Illuminate\Support\Facades\Storage;
9
10 class CategoryController extends Controller
11 {
12
13
14
15     public function category()
16     {
17         $category = Category::orderBy('created_at', 'desc')->paginate(5);
18
19         return view('admin.category.category', compact('category'));
20     }
21
22
23
24
25
26     public function addCategory()
27     {
28         return view('admin.category.addcategory');
29     }
30
31
32
33
34     public function storeCategory(Request $request)
35     {
36         $request->validate([

```

The IDE interface shows tabs for `web.php`, `master.blade.php`, `OrderController.php`, `UserController.php`, `CategoryController.php`, `home.blade.php`, `DatabaseSeeder.php`, and `ProductController.php`. The bottom status bar indicates the terminal is active in bash mode.

```

1  namespace App\Http\Controllers\Backend;
2
3  use Illuminate\Http\Request;
4  use App\Http\Controllers\Controller;
5  use App\Models\User;
6  use Illuminate\Support\Facades\Hash;
7  use Illuminate\Validation\Rule;
8  use Illuminate\Validation\Rules;
9
10
11  class UserController extends Controller
12  {

Authentication and Users

The screenshot shows a code editor interface with the following details:

- File Path:** component-2-sandesh123paudel/app/Http/Controllers/Auth/AuthenticatedSessionController.php
- Code Content:** The code is for an `AuthenticatedSessionController`. It includes methods for handling login requests and destroying sessions. It uses Laravel's `Auth::guard('web')` for authentication.
- Editor Tools:** The interface includes an Explorer sidebar, a search bar at the top, and a terminal tab labeled "bash" on the right.
- Bottom Status Bar:** Shows the command line prompt: `sandy@Sandesh1Lenovo MINGW64 /d/Bsc Computing/Sem7/AwE/Component 2/component-2-sandesh123paudel (master)`.

Version Control

The screenshot shows a GitHub repository page with the following details:

- Repository Name:** component-2-sandesh123paudel
- Branch:** master (selected)
- Commits:** 44 commits ahead of main, 4 commits behind main.
- Activity:** Recent commits include "Readme File Updated" by sandesh123paudel, "GitHub Classroom Feedback", and "laravel project created".
- Contributors:** 1 contributor (sandesh123paudel).
- Pages:** About, Releases, Packages.

Silver Point Restaurant - Restaurant Management System

VLE Repo **The British College Repo**

Overview

Welcome to the Silver Point Restaurant project, an advanced web engineering assignment developed by Sandesh Paudel for Level 6 at The British College. This project serves as a comprehensive Restaurant Management System.

The screenshot shows the homepage of the Silver Point Restaurant website. At the top, there is a navigation bar with links for Home, Menu, About Us, Contact, and a user account section for Sandesh Paudel. A shopping cart icon indicates 0 items. Below the navigation is a large banner featuring a vibrant salad dish with the text "Beautiful Salad" and "A good healthy vegetarian combo". Underneath the banner, there is a section titled "Our Specialties" with five categories: Appetizers/Starters, Soups, Salads, Entrees(Main Course), and Side Dishes, each accompanied by a small thumbnail image.

Menu With Sorting and Searching

The screenshot shows the menu page of the Silver Point Restaurant website. At the top, there is a navigation bar with links for Home, Menu, About Us, Contact, and Register. A search bar at the top right contains the text "chicken". Below the search bar, there are filters for Sort and Type, both currently set to "All". The main content area is titled "Categories" and lists various food types: Appetizers/Starters, Soups, Salads, Entrees(Main Course), Side Dishes, Dessert, Beverages, Specials Items, and Sandwiches and Wraps. To the right, there is a search result for "chicken" showing three items: "Chicken Satay", "Chicken Noodle Soup", and "Chicken Caesar Wrap". Each item has a thumbnail image, a title, a brief description, and a price. The "Chicken Satay" item is described as "Skewers of marinated and grilled chicken, usually served with a peanut sauce." The "Chicken Noodle Soup" item is described as "Classic chicken soup with tender chicken pieces, vegetables, and egg noodles. It's a comforting and...". The "Chicken Caesar Wrap" item is described as "Grilled chicken, romaine lettuce, Parmesan cheese, and Caesar dressing rolled up in a tortilla".
